The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 17-18, and 29-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Anderson.

Anderson shows a device for retaining an arcuated/spherical object comprising a housing, D,C,A,B having upper and lower housing parts A,B, upper and lower insert parts G,G having a desired configuration, and a locking mechanism E,e,C. The lowermost portion of the lower housing part may be termed a base integral with the lower housing part. Anderson shows that the housing parts may accept different shaped upper and lower insert parts. The shape of the cavity in the upper and lower insert parts is considered to be configured to at least partly contact a golf club head.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson.

The material chosen (type of resin) for the insert, and the strength, hardness, specific gravity, coefficient of thermal expansion chosen are no more than an obvious matter of design choice absent a showing of criticality for these features. One skilled in

the art would be motivated to select the material having a desired strength, hardness, specific gravity, and coefficient of thermal expansion that would be commensurate with the type of workpiece being held, the type of forces to be applied to the work in the work treatment operation, and the type of heat to be applied during the work treatment operation.

Claims 8, 19, and 36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 20-28 are allowed.

Applicant's remarks have been given careful consideration. Applicant traverses the 35USC102(b) rejection because applicant is unable to find the reference character "e" in the Anderson reference. It is respectfully submitted that applicant has not carefully reviewed the Anderson reference because reference character "e" is clearly shown in Figure 4 of Anderson and is clearly described in column 2, line 7 of the Anderson specification. Applicant traverses the 35USC103 rejection on only general and non-specific grounds; ie., applicant merely presents a form paragraph that makes no remarks concerning the Anderson reference specifically but makes remarks that could apply to any 35USC103 rejection.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3723

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
